What is HEALTHY Cattle Strip & How to Use

Prevention of Skin Lumpy Disease (SLD)

Using our Bio Refresh Frequency Embedded Technology Strip, using Water only .

Re: Possible Remedy for LUMPY SKIN DISEASE. (LSD) in Dairy Animals.

The Lumpy skin disease (LSD) in cattle gets spread by Mosquitoes, , Flies, lice, and wasps by Direct contact amongst the cattle and through contaminated water and food.

Our Bio Refresh Strip Water is Anti Bacterial, Anti mold, Anti fungal, Anti bees, Anti mosquitoes and Anti odour.

How to use?

Dip/ suspend the strip in a drum of water 100-200 litres for 30-60 minutes.

The water will be ready for use.

Solution:

Once Or twice when the cattle is bathed (bath) or Sprayed with this water, the cow or buffalo gets protection against all these bees/insects etc.,

These flies will not sit over the cows/ buffalos.

This is the easiest way to keep the infections away from the cattle and prevent SLD.

One can also completely wash the cow shed with this water. There will be no flies, Bees, mosquitoes etc. in the place. Besides, the cow shed will be totally odour free and completely Hygienic.

We are very confident that this Bio refresh strip will greatly help to reduce the Lumpy Skin Disease.

We will possibly save the dying cattle.

Safety: It only water that is used for bathing the animal / spraying over the animal.

Therefore it is totally safe.
